PRIVATE EQUITY

Weintraub attorneys represent clients on both the company and investor side of private equity transactions. These include leveraged buyouts, growth investments, senior debt loans, and hybrid deals. Additionally, we counsel clients on internal governance matters and compensation structuring. We also provide advice regarding investor rights, spin-offs, and roll-ups.

Clients we represent include private equity funds, lenders, portfolio companies, management groups, family funds, and consortiums. Our corporate team provides strategic and operational counsel to private equity sponsors and portfolio companies throughout the investment process. Our work spans a variety of industries, such as technology, agribusiness, retail, manufacturing, and biotech.

We work with other practice groups within the Firm to provide additional insight and services, including advice and representation with respect to intellectual property, litigation, tax, compensation and benefits, and real estate.

Our Firm provides comprehensive services to further the strategic objectives of our clients within the private equity context, from initial investment to exit.
